## President's Report

I am pleased to report that the 2011/2012 has been another very successful year for CICA. Alan Marshall's CEO Report and Jeff Brundell's CraneSafe Report on the following pages of this Annual Corporate Report cover in detail our various highlights and achievements. I will cover some other important areas that need to be reported.

For an organisation to be successful, have a secure future and implement its strategic plans it needs to be financially strong and CICA is, as the following numbers for the

2010/2011 year indicates:

- Turnover: \$1.21million, an increase of 7.5% over the previous year.
- Surplus: \$351,000, an increase of 7.3%
- Total Retained Surplus is \$2.3 million.

In the past year CICA has attended and been involved in the following international events:

- The 13th International Crane Technical Liaison Group meeting held in San Diego on 21<sup>st</sup> September, 2010.
- SC&RA Crane & Rigging Workshop held on 22-23<sup>rd</sup> September, also in San Diego.
- The 14<sup>th</sup> International Crane Technical Liaison Group meeting held during ConExpo in Las Vegas on 24<sup>th</sup> March, 2011.
- The Crane Association of New Zealand Conference held in Queenstown on 7-8<sup>th</sup> July, 2011.

*CANZ Conference*

The Board strongly believes that CICA, as the national organisation representing the crane industry, must be involved in these major events in order to fulfil the obligations of our Mission Statement.

We have continued to communicate, work with and meet with many local and international organisations including:

- The National Precast Concrete Association
- Elevating Work Platform Association
- Hire and Rental Association
- Specialized Carriers and Riggers Association (SC&RA)
- Lifting Equipment Engineers Association
- The European Association of Heavy Haulage Transport and Mobile Cranes. (ESTA)
- The Crane Association of New Zealand
- The Federation of European Manufacturers (FEM)
- National Commission for the Certification of Crane Operators

Communication is a vital tool that CICA effectively uses to advertise and to advise, both our members and the rest of the crane world, of our achievements and progress on new initiatives. Some of the sources we use on a regular basis include:

- The CICA Newsletter (6 issues per year)
- The Cranes and Lifting magazine (4 pages per issue & 6 issues per year)
- The Cranes Today magazine
- The International Cranes magazine
- Cranes & Access magazine
- The Vertikal website

*CICA Board Meeting 17/2/11 at the CICA Office*

The demands on the directors continue to increase each year and we are fortunate that most directors have found the time to give willingly and freely to the industry. I am delighted that our first term Directors Cheryl Woodhart, Dean Short and Ray Brenton have stepped up to the mark and, after a short settling period, are getting actively involved. Each bring different qualities to the Board. Cheryl is our first female director and passionately represents and supports the interests of the fledgling Northern Territory Crane Association, South Australia and the smaller businesses. Dean, being an employee of a very large crane rental business, with focus on the corporate and business principles and Ray, being an employee of the large construction company and a significant end user of cranes, bring a different perspective to the Board.

Unfortunately Steve Lazenby was required to resign as a Director during the year due to changing employers and realising that he could not devote the time necessary to fulfilling his requirements as a Director. We thank Steve and we hope that we will see him back on the Board at some time in the future. We also thank Steve for all of his hard work in making the 2010 Crane Conference and Crane Display an outstanding success.

*Stephen Lazenby*

I would like to reference some other tasks that we have been involved in over the past year:

- Representation on the National Transport Commission's Industry Advisory Group
- Representation on several Australian Standards committees
- Judging of the Lift of the Year Awards
- Meetings with various State WorkSafe authorities
- Reviewing and commenting on documentation issued by Safe Work Australia
- Presenting at the National Transport Regulators' Oversize and Overmass Conference
- Various meetings on the development of the Traineeship for the Crane Industry and the Mobile Crane Hiring Award variation
- The continued push to achieve national uniformity with road regulations, in particular with the 12 tonne per axle and the use of 16.00 tyres

Considering all of the activity listed above (and referencing to Alan and Jeff's reports), one can quickly sense that the CICA Board are very busy, as are the full time staff based in our Melbourne office. The Board is tremendously supported by this great hard working and dedicated staff.

I must touch on the one negative over the past year and that is the employment of the CraneSafe Engineer. Our first attempt proved to be unsuccessful. However we have advertised the position again and with a choice of several quality applicants, we expect to be able to announce the successful candidate soon.

Alan Marshall (our CEO) is a great leader, an ultimate professional and dedicated to servicing the interests of the members. He spends a lot of his time travelling to various parts of Australia and beyond to meet with members and attends at least one meeting per year of every State Association. You can count on Alan to give a very comprehensive update of CICA's activities. On behalf of all members, I would like to thank you Alan and I would also give you my personal thanks for all of your assistance, guidance and support that you have shown to me.

Also on behalf of the members, I would pass on our thanks to the wonderful staff consisting of Lisa, Kylie, Donna and our new addition, Michelle.

I would invite members to visit the CICA office if you happened to be in Melbourne. The members own this office and it's well worth the effort to visit, especially that the three new Honour Boards are now installed. The Honour Boards lists all Presidents since the inception of CICA in 1979, Life Members and Award Winners. Also now on display in the office is the World Crane & Transport Alliance Certificate, signed in Amsterdam in 2009.

I would like to especially thank two directors, Danny Black and Jeff Brundell. I will not go into detail of the work that these two do, but let me ensure you that it is most significant, demanding and time consuming.

I pass on my thanks to the rest of the Board, keep up the commitment and keep striving to maintain CICA as the great organisation that it is today. CICA is truly recognised both locally and overseas, as the voice, the authority and the leader of the Crane Industry in Australia.

One busy year finishes and the next begins, we look forward to the challenge.

**John Gillespie**  
President

# Chief Executive Officer's Report

Each year I am pleased to be able to table my report to the CICA Members via the CICA Annual Corporate Report and for the important CICA Annual General Meeting (AGM).

I strongly believe that regular communication with CICA members, the states and the wider industry is a major responsibility for CICA. The CICA Board and the Office team never lose sight of the important fact that CICA is a member-based organisation – and without our Members we are nothing. Strong membership numbers, active involvement and leadership make us a strong industry. So as always, I encourage our Members to be active, to read our newsletters, emails, reports, websites, attend meetings, conferences and oversee our directions and progress – at national and state levels. I promise you .... this will only help your business. In time, many of you will step-up to contribute to state and national volunteer committees, playing a stronger role and adding your expertise and energies to industry leadership. Thank you. As always, I invite and welcome Member feedback on industry matters, your views and concerns. CICA will continue to push forward to represent and progress the industry, at all times advancing our Mission Statement objectives.

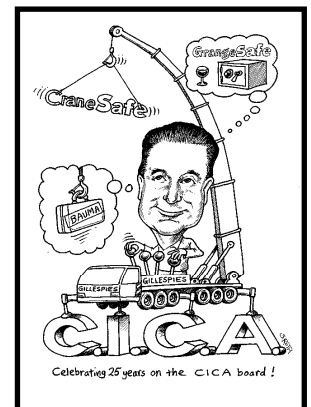

## Highlights and Achievements

Despite the many industry and business-level challenges, the Board is pleased to report another highly successful year for CICA as the national industry body. CICA is essentially a small business, duly incorporated and registered with ASIC. The Board on behalf of Members demands CICA be managed effectively, in line with good business principles. Taking into account Members, the volunteer Board, the states, and the paid office staff ... CICA is one big team. Therefore it is satisfying to reflect on our highlights and joint achievements over the last 12 months.

- ❖ The CICA financial results for the 2010-11 year have been very strong, reflecting the CraneSafe and membership related business growth, as well as the prudent financial policies and oversight of the Board. Members can be reassured of CICA's ongoing financial stability.
- ❖ The CICA membership numbers continue to grow, with a record 250 members in sight. We now focus on our next target of 300 members and getting remaining state members to join. Please encourage your colleagues to join CICA.
- ❖ The 2010 Conference in Perth was a wonderful and highly successful event. Many thanks go to the Conference Team, led by Stephen Lazenby and CAWA team. Special thanks to Manitowoc as the 2010 Platinum Sponsor and to all our sponsors and exhibitors. The Gala Awards Dinner was very special. I congratulate the Lift of the Year Award winners, including John Holland P/L as the Bill Shaw Memorial Trophy winner, as well as John Gillespie who was awarded CICA Life Membership.

*The Bill Shaw Memorial Cup presented to Stuart Edwards, John Holland Pty Ltd (on the right) by John Gillespie, CICA President*

*Sketch presented to John Gillespie on the occasion of his Life Membership presentation.*

*Life Membership Plaque and Commemorative Sketch presented to John Gillespie (left) by Jeff Brundell CICA Director*

- ❖ The CraneSafe Program, owned by our industry to better safeguard and improve the industry, continues to develop under the leadership of Jeff Brundell (CraneSafe National Director), the CraneSafe Steering Committee and the Board. In the last year to the 30 June 2011, 5,456 cranes were assessed representing 12.1% growth on the previous year. Strong growth has been registered in Vehicle Loading Cranes and Truck Mounted Concrete Pumps.

The Administration team comprises Kylie Charrett, Donna McDonald and Michelle Rea. Led by Kylie they are doing a wonderful job for the industry. In addition to ensuring the Green Stickers are issued on time, Kylie has stepped up to do many other tasks under the instructions of the Steering Committee such as: organised all the Assessor Meetings; managed new applications; progressed quality issues and endorsement withdrawals; managed various email communications; managed the website; assisted on the data base improvements; progressed the records scanning project; and managed her team staff. Importantly our CraneSafe Technical Manager / Engineer (again under recruitment) will deliver a dedicated full-time professional resource to work with Jeff Brundell to progress many projects, in particular the vital assessor audit program. The CraneSafe (new) business plan is now on the CraneSafe website. I thank all supporters of CraneSafe for their vision and commitment and I especially thank the Assessors, as third-party contractors whose independence, quality and hard work delivers the program its industry credibility.

- ❖ Various industry initiatives and activities have been progressed during the last year such as: the CICA Training Project (Andrew Esquilant will do an update report at the Conference); the Operator Training Log Book (Nick Morris is organising samples to be at the Conference); the Safety Manual Review is underway due for release in 2012; the CICA Endorsed Engineers List criteria (now on the website); the CICA Major Inspection Gold Plate Certification Audit is under development; the Dogging training DVD is in the pipeline; the crane industry accident scheme was launched; international input and representation continues via the World Crane Alliance; key input to the OH & S national harmonisation project (thanks to Jeff Brundell); the CICA history book is getting closer; the CICA-State MOUs alliance agreements are all in place; the regular CICA Industry Report in the Cranes & Lifting magazine .... and more!

*L-R: Dean Short (CAWA President) & Alan Marshall (CICA CEO) sign MOU*

- ❖ CICA's role as the peak industry body and national voice continues as our 'number one' priority. Each year, much of our ongoing industry representation and lobbying at state and national level takes place behind the scenes through the important volunteer efforts of the Board (led by John Gillespie and Jeff Brundell) and the state Presidents/Committees. There are ongoing industry challenges and CICA continues to work hard to represent the best interests of members and the wider industry. The CICA Industry Forum which takes place at the Conference is a significant mechanism for consulting with the states and Members. Please use this opportunity to input and assist the industry achieve its goals.
- ❖ The CICA membership, finance and event administration workload is carried by Lisa Legge who does a great job. Lisa manages many projects and programs such as the membership data base; annual membership renewals; the annual member survey; CICA products and marketing; the annual new member marketing campaign; the Board elections, the Industry Forum, the AGM, the Newsletter, member emails, the CICA website, the CICA budget, monthly financial reports; the CICA Annual Reports; and plays a major role in the Conference Team tasks including the important Lift of the Year Awards. During the last year Lisa has been instrumental in finalising the CICA Honour Board now displayed at the CICA Office.

❖ The 2011 Gold Coast Conference has been a huge commitment over many months (as it is every year) so I hope attendees enjoy the many activities. I thank the Terex team as the 2011 Platinum Sponsor. Special thanks go to Albert Smith, Danny Black, Ray Brenton and the rest of the Conference team of Mark Happer, Michael Moloney, Stuart Edwards, Andrew Esquilant plus John and Luba at Conference-Plus (our PCO); as well as the CICA Office input.

2011 Conference Committee Meeting at the Surfers Paradise Marriott Resort & Spa

❖ The CICA Lift of the Year Awards Program is a major part of our annual activities (sponsored by Cranes & Lifting magazine). I congratulate the 2011 nominations announced in the August Newsletter, in total 5 entries. I take this opportunity to encourage the Members to further support these important awards, a significant way we celebrate our industry. Please begin your planning for next year's Awards now.

2010 Winning Category A Lift - John Holland Pty Ltd

❖ On behalf of all members, I thank the current CICA Board Directors for their ongoing volunteer efforts and industry leadership: John Gillespie, Danny Black, Jeff Brundell, Albert Smith, Malcom, Smith, Marcus Ferrari, Andrew Esquilant, Dean Short, Cheryl Woodhart, Nick Morris; Ray Brenton and those Directors that retired from the Board during the financial reporting year i.e. Craig Meldrum and Stephen Lazenby.

### Looking Ahead

Building on our great history and current strength, CICA must continue to step up to progress the industry as we look forward and plan the way ahead. Key tasks to be addressed include:

- Progressing our current business plan priorities
- Continuing the close-working relationship with the states
- Monitoring the impact of the new OH&S harmonisation regime from 1 January 2012
- Developing the new Strategic Planning process, embracing the 2020 Vision Project and One Association debate
- Working with the SACA team on the 2012 Adelaide Conference (5-7 September)
- Developing the 2013 Conference preliminary plans with the VCA team
- Developing the CraneSafe Program including resourcing and succession plans
- Implementing the agreed Major Inspection projects to improve the industry standards and serve our Members
- Supporting industry leadership and succession plans, nationally and state by state

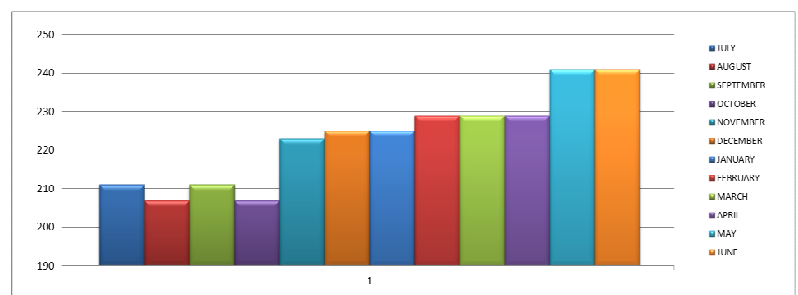

2010 Winning Category B Lift - Kelly's Crane Hire

To the Members: on behalf of the CICA Board and Office Team, I thank you for your continued support and contributions. As always, it's your industry.

*Keep Lifting Australia!*

**Alan Marshall**  
Chief Executive Officer

CICA Membership Growth 2010-2011

# CraneSafe National Director's Report

The role of CraneSafe in the Crane Industry is becoming more important with recent changes to Australian Standards and the imminent release of new Plant Regulations due in January 2012. The obligations for owners and users of our equipment are becoming draconian with the new Regulations. Fines up to \$3,000,000 for a corporate; \$600,000 and 5 years jail for individuals have certainly ensured that a great deal of time and effort are going into a process that helps protect our members. This starts with the CraneSafe log-books, CraneSafe periodic inspections, CICA Engineers List, and will culminate in the CICA Major Inspection Verification process. The last 2 items in the above list are being developed and will be finished by our new CraneSafe Engineering Manager before the introduction of the new regulations. Hopefully the new initiatives will minimize possible issues that our members may inadvertently become involved in.

Not that we can solve every problem. Everyone in business has his own obligation to know all of the regulations and to conform to them, but we can assist in providing our members with the tools to overcome the myriad of legal obligations being imposed. This is the unknown and untrumpeted work that CraneSafe and CICA do. As you would imagine, the \$27 hirer's membership does not go a long way to pay for 5 specific CraneSafe staff and an office, so the cost of the CraneSafe Green Sticker is used to pay for these staff in addition to paying for safety initiatives that the crane industry requires.

*CraneSafe Victorian Assessors Meeting 4/2/11  
at the CICA Office*

A great deal of revision of CraneSafe log-books to incorporate routine inspection requirements and the ability to record data-logger information has already been completed, as well as revisions to the CraneSafe assessment reports to comply with the new changes has also been completed, so there will be no interruption to our service, or there will be issues not covered from a regulatory point of view.

The acceptance of CraneSafe is now universal across all of Australia and Papua New Guinea. In the past 12 Months we have conducted over 5,500 assessments, and have assessed a total of 8,483 different cranes since 2002 and found 32,860 faults during that time. We are currently substantially up-grading our software so that we are able to provide even more services from the data collected to assist the crane industry overall. Debate is still raging across many states as to what axle loads are required by industry versus what is allowed by the regulators. Our data-base enables us to pinpoint exactly how many cranes are operating down to post codes, how many axles, hours of operation per year, kilometres travelled and how many road worthy issues have been encountered. The possibilities are endless, and the information is far greater than the regulators have. We can tell them the answers instead of going with cap in hand and only guess work for them to attack.

Within the next 3 months we will celebrate the 10<sup>th</sup> anniversary of the first CraneSafe inspection. We have come a long way since then and we are only at the beginning of the process. The next 10 years will be even more fulfilling and rewarding for all of the existing and new CraneSafe users.

Regards,

**Jeff Brundell**  
CraneSafe National Director
